

Rheumatoid Arthritis Patients

How many swollen or tender joints do you have?

This is a tool used by your doctor to magnify and identify joints affected by RA.

Instructions:

Please place an X in each circle that corresponds to the location of your swollen or tender joint(s).

Add up the total number of X's and write it below. Please return this form to your healthcare provider.

Total: _____

This is not a tool for diagnosis. Only your doctor can diagnose and evaluate your individual medical needs. Evaluating your tender and swollen joints is one of many tests to evaluate your disease activity. Increased awareness and education regarding your condition can help support conversations between you and your doctor to optimize your treatment.
